

The philosophy of 'light and sound' is an intrinsic element of the DNA of the Meydan masterplan. These attributes are impactful at major events, including the Dubai World Cup Festival, and feature prominently in entertainment programmes that attract royal family, heads of government, UHNW investors and tourists alike.

Spanning a mile (1600m), the grandstand at Meydan Racecourse is the longest anywhere in the world. It is inclusive of a six star hotel, museum, boat house and the iconic 'bubble' shaped lifestyle club. Meydan Grandstand has a capacity of 60,000.

Dubai's Meydan Racecourse Equine City was designed to bring the sport of thoroughbred horse racing into the new millennium and present it as a focal point for the broader community. This facility represents the highest standards of excellence and integrates the world's largest racecourse, support facilities, hospitality amenities, commercial and more.
