YEAR	ITEM	PROJECTS	SCOPE
2001	1	Pulai - Petronas Tankage, Johor, Malaysia	Masterplan
2005	2	GHQ Masterplan, Pakistan	Masterplan

Integrated urbanism, TAK's approach to master planning, acknowledges the interdependence of urban systems and communities as well as the effects of global issues, such as climate change resilience and economic uncertainty, on the future of our cities.

Our master planning design are built on our insight into the way places influence:

- ❑ Wellbeing
- ❑ Work
- ❑ Lifestyle

They are also built on our technical understanding of interconnected systems such as *transport, energy, waste* and *information*. Projects like the 'palm master plans' of Dubai demonstrate the pure interconnectivity of all of these attributes in a sophisticated manner and at a scale rarely realized.
